AI product & transformation leader | scaled agentic AI workflows to replace rote operations with delightful experiences, 4,000-node inference networks, and enterprise/industry process excellence.

Selected portfolio

AI strategy & innovation leadership

- Designed and built **tbone.ai**, a template-based mini-app builder for deploying customized LLM assistants and agentic workflows to enterprise teams — enabled process optimization and automation without heavy tech staff involvement.
- Advised **Distributed Intelligence / Datamall**, a peer-to-peer AI inference and file storage service: scaled from concept to 4,000+ deployed compute nodes (NVIDIA, Mac Mini, custom Pico-ITX) with libp2p networking, Docker orchestration, and Ethereum token economics. Delivered operational workloads for NetEase, Tencent, and Ant Financial, plus personal file backup and finance chatbots.
- Architected internal **agentic AI systems** at scale: replaced majority of rote staff roles with LLM-driven agents integrated across Moodle LMS, Freshdesk, Slack, Google Sheets, and custom data-lake orchestration — drove efficiency while maintaining 98%+ completion rates on enterprise/government contracts.

Pharma process improvement & supply chain transformation

- Spearheaded enterprise blockchain adoption for pharmaceutical supply chain integrity and serialization (DSCSA compliance) via **Chain 76** industry workshop with EY and Merck Animal Health.
- Liaised with ISPE GAMP Blockchain SIG to co-create standards and engage FDA on approval pathways; provided technical review, customer workshops, and regulatory guidance for **EY Nightfall** public blockchain supply-chain tracking protocol.
- Enabled Merck vaccine inventory tracking and broader pharma visibility improvements through complex tech translation for enterprise needs.

Industry-wide AI & technology adoption

- Lead author of ERC-721 Non-Fungible Token Standard (Solidity/Rust/EVM), creating a new asset class for serializing and tracking real-world assets in supply chains. Drove global adoption through government liaison (US, Europe, China, Mexico), workshops, and EIP process leadership—unlocked trillions in ecosystem value and onboarded enterprises including Microsoft Xbox, Merck, Breitling and Moncler (each is a direct advisory relationship or through my clients EY and Arianee).
- Designed, commercialized and deployed immutable ledger system for Quintana Roo, Mexico government: mandated COVID test tracking for all inbound air passengers, integrated 20+ labs, supported tourism rebound with forgery-proof verification.
- Prevented \$100M+ in vulnerabilities through proactive audits and incident response; provided executive coaching (2+ hrs/week calls) to CEOs/CTOs on AI/blockchain product strategy and risk mitigation.

Experience

Phor Tech Growth Lab, *proprietor*

Rydal, PA, Jan 2014–present

- Architect zero-to-one AI and blockchain products, including agentic LLM workflows, P2P inference networks, and supply-chain visibility solutions for clients such as Airbus, EY, Microsoft, Arianee, and Merck.
- Lead cross-functional teams, product positioning, technical reviews, operations, and enterprise/government adoption initiatives—including industry workshops, hackathons, podcasts, and regulatory liaison across US, Europe, and China.

- Drive open development practices and standards creation to accelerate ecosystem growth and talent pipelines.

Modern Training Solutions, LLC, v.p., general manager

Dec 2012–present

- Scaled remote-first SaaS learning platform from \$750k to \$2M peak revenue and 180k+ lifetime enrollments; secured \$600k+ exclusive statewide government contracts (PASSHE/CCDBG) with 98% + completion rates and >90% satisfaction.
- Personally architected custom Moodle LMS + Eleventy JAMSTACK frontend + internal Team Page data-lake orchestration (unifying Moodle, Freshdesk, Slack, timesheets, and Sheets via webhooks/SQL), supporting internal team and external stakeholders for global async operations.
- Pioneered heavy agentic AI augmentation since 2020: replaced majority of rote staff functions (content, support, marketing analysis, outreach) with LLM agents while upholding DoD SECRET clearances, Section 508/WCAG accessibility leadership, and achieved carbon-negative operations.
- Led ruthless MVP execution, virtual skills testing pivot during pandemic, global remote team growth (1 to 20+), full P&L ownership, and regulatory navigation.

Tata Consulting Engineers USA, LLC, sr. financial analyst

Sep 2010–Dec 2012

- Led development and deployment of IBM Cognos / Oracle ERP system for business planning and forecasting; project-managed transition for 700 operating units from Excel.
- Conducted valuation modeling for executive hold/sell decisions, competitive analysis, and FAS-142 filings; supported two acquisitions and one reorganization thru planning, HR, and integration functions.
- This company was formerly CDI Corporation

Discovery Semiconductors, Inc., business analyst

Apr 2008–Jun 2010

- Won and managed government research contracts leading to products used in outer space (joint ESA+NASA mission), defense, and atomic clock calibration.
- Designed and built carrier-grade SONET network using commercial off-the-shelf components.

Early career

- **Google, Inc., contractor**—Implemented session state management for KDE Linux GUI and founded robust mentoring/onboarding program for technical talent.
- **US Navy (Philadelphia, PA), engineering apprentice**—Programmed and tested safety-critical SCADA systems (Ada, VMEBus) now deployed on USS Ticonderoga-class warships.

Education

Drexel University, MS finance; MBA (Dean's Fellowship)

2008

Villanova University, BS Comp. & Elec. Engineering, Mathematics Minor (Dean's List)

2006

- Senior project: data mining Thefacebook; received US National Security Agency invitation.
- William Lowell Putnam Mathematical Competition top Villanova scorer (2003, 2005).

Additional credentials

- Actuarial exams passed: Exam P, Exam FM (SOA/CAS); IBM Certified Solution Designer.
- Member, Delaware Valley Mensa; Founder, LeBow Toastmasters.
- Publications: ERC-721 Non-Fungible Token Standard (2018); Bled Strategic Times article on digital decentralization (2018); US Patent Application US-2020-0317242-A1 (city transit/train scheduling, 2020)
- Chinese language skills / passed HSK level 4
