Digital-assets advisor | tokenization, enterprise
blockchain delivery, regulated implementations

Summary

Independent advisor on digital-asset strategy and implementation. Lead author of ERC-721. Independent contractor to EY LLP on the token design behind Nightfall. Operator of a regulated remote-delivery education business. Combines protocol-level work on tokenization, wallets, custody mechanics, and settlement architecture with production delivery and operating-model design.

Selected client engagements

Ernst & Young LLP — independent contractor, Global Innovation Blockchain R&D Feb–Dec 2019

- Helped EY’s Global Innovation Blockchain R&D center design zero-knowledge methods for private transfer of existing token models on Ethereum.
- Contributed the ERC-721-compatible token framework Nightfall used to separate a physical asset from legal title.

Life sciences supply chain — Chain 76 / ISPE GAMP 2018–2021

- Organized and led Chain 76 in Philadelphia, a two-day industry workshop on pharmaceuticals, supply chain, and blockchain. Convened enterprise and life-sciences participants on DSCSA-aligned serialization, tokenized inventory tracking, and public- versus private-chain architecture.
- Contributed technical review through the ISPE GAMP Blockchain SIG on FDA-facing questions for tokenized inventory and serialization.

Arianee — advisory board, token standard and digital passports 2018–

- Joined Arianee’s advisory board after ERC-721 finalization. Advised the protocol team on token interfaces and certificate-of-authenticity design used in luxury digital-passport programs.

Namefi — tokenized DNS product design 2024–

- Advised an ICANN-accredited registrar tokenizing existing DNS names as NFTs on Ethereum and Base. Scope covered registrar operations, on-chain settlement, and the legal-title boundary for real-world-asset tokenization.

TreasureDAO — Marketplace smart-contract review 2022

- Reviewed Treasure Marketplace (Arbitrum) before release. Identified issues in owner privilege, listing and cancellation mechanics, fee-change frontrunning, and upgradeability. Findings published as GitHub issues and engaged with public response.

GenoBank.io — Laboratory-result certification Jun 2020–Dec 2022

- Advised Genobank.io and led 0-to-1 product work on blockchain-certified laboratory results — certificate design, prototypes, packaging, and laboratory integrations — then sat with partner labs on rollout.
- Same platform was white-labeled for SOMOS Ancestry ancestry kits and other diagnostic permittees, and used in Quintana Roo’s traveler COVID-test verification program on Avalanche.

Professional experience

Wm Entriken Design / Phor Tech Growth Lab

Rydal, PA / 2015–present

Principal advisor

- Independent practice covering tokenization standards, enterprise blockchain architecture, security review, and regulated product implementation. Representative work listed above.
- Acknowledged contributor to NIST IR 8301, Blockchain Networks: Token Design and Management Overview (2021).
- Standards process work: RFC 2119 requirement language in EIPs, two-week review convention for ERCs, and machine-readable Solidity interfaces used by later token standards.

Modern Training Solutions, LLC

Huntingdon Valley, PA / 2012–present

Vice president & general manager

- P&L owner of a remote-first professional-education platform. Company-published figures: 150,000+ enrollments; \$600k+ exclusive statewide Pennsylvania training contracts (PHMC / ECE PDO @ PASSHE) at 98%+ completion.
- Built the operating model: custom Moodle LMS, accreditation and Section 508/WCAG controls, and a distributed team delivering government and enterprise contracts.

CDI Corporation (later Tata Consulting Engineers USA)

Philadelphia, PA / 2010–2012

Senior financial analyst, corporate development

- Led deployment of IBM Cognos planning and forecasting for approximately 700 operating units migrating from spreadsheet processes. Supported valuation and hold/sell analysis, FAS-142 work, two acquisitions, and one reorganization.

Discovery Semiconductors, Inc.

Ewing, NJ / 2008–2010

Business Analyst

- Won and managed government research commercialization (SBIR/STTR), including photoreceiver work proposed for the NASA/ESA LISA mission. Edited the technical proposal later published on the NASA Technical Reports Server.

Earlier technical roles

2002–2006

Google (contractor); U.S. Navy engineering apprentice

- Google: session-state work on the KDE Linux desktop and an onboarding program for volunteer technical contributors. Navy (Philadelphia): programmed and tested safety-critical ship SCADA systems later deployed on Ticonderoga-class vessels.

Standards and publications

- Lead author, ERC-721: Non-Fungible Token Standard (EIP-721, 2018), with Dieter Shirley, Jacob Evans, and Nastassia Sachs. Production use includes OpenZeppelin Contracts and enterprise NFT certificate programs.
- Co-author, ERC-165: Standard Interface Detection (EIP-165, 2018). Additional EIPs include EIP-2228, EIP-6049, EIP-7768, and EIP-7848.
- Entriken, W. (2018). Direction: decentralization. Bled Strategic Times / Bled Strategic Forum.

Education and credentials

- Drexel University, M.S. finance; M.B.A. (Dean's Fellowship) 2008
- Villanova University, B.S. computer and electrical engineering; Mathematics minor 2006
- SOA/CAS Exams P and FM, IBM Certified Solution Designer, HSK 4 Mandarin, Delaware Valley Mensa
